

Jeju National University Hospital Health Promotion Center

Lifetime Partner in Health Care

Jeju National University Hospital Health Promotion Center

Jeju National University Health Promotion Center doesn't offer simply health checkups based on test results but rather the customized consultations and on-going concern for examinee's well-being. We'll provide the examinees with special service to improve and maintain their health.

Just knock on the door
We will be your lifetime
health care partner

Features of Jeju National University Health Promotion Center

Most of the tests in the program are available in a fresh, comfortable environment without moving.

The introduction of different kinds of health checkup programs makes it possible for the patients to have extensive medical checkups they want.

Each specialist of Jeju National University Hospital conducts examinations such as ultrasonography, radiography, endoscopy and diagnose.

You will be connected with the appropriate doctor to receive swift treatment after finding something wrong in your body.

Delicious soup will be provided to appease the hunger after the checkup.

Above all, this center's best feature is to provide lifetime customized and extensive health care to every examinee.

For the convenience of the examinee, a checkup notice, health checkup questionnaire, and sample container will be mailed two weeks before the scheduled check-up.

Checkup program to screen for frequent diseases and assessment of dangerous factor to develop diseases according to age

※ Redundancy cost discount available for the National Health Insurance Service (NHIS) health checkup subjects.

[W]

Health risk checkup program for people in their 20-30s

M 600,000 **F** 630,000

Green Checkup

Anthropometry / Obesity / Vision, Intraocular pressure / Pulmonary function test / grip test / Electrocardiogram / Urinalysis / Heart rate variability test / Blood test I (Common blood, Liver function, Kidney function, Thyroid function, Chronic hepatitis antibody) / Hepatitis A antibody / Chest radiogram / Abdominal Ultrasonography

• **add for female** : Rubella antibody ※ Cervical cancer screening by the NHIS can be done concurrently.

Screening program for cancer with high incidence in over 40s

M 885,000 **F** 1,035,000

Blue Checkup

Anthropometry / Obesity / Vision, Intraocular pressure, Fundus / Pulmonary function test / grip test / Electrocardiogram / Fecal examination and Urinalysis / Blood test II (Blood test I + Arteriosclerosis, Tumor marker, Pancreatic enzymes, etc.) / Hepatitis A antibody / Chest radiogram / Abdominal Ultrasonography / Gastroscopy (or upper gastrointestinal series)

• **add for female** : Mammography / Liquid-based cervical cancer screening test, HPV DNA test

Screening program for middle-aged diseases and major cancers

M 1,110,000 **F** 1,260,000

Gold Checkup

Anthropometry / Obesity / Vision, Intraocular pressure, Fundus / Pulmonary function test / grip test / Electrocardiogram / Fecal examination and Urinalysis / Blood test III (Blood test II + Bone Markers, Vitamin D, etc.) / Sex Hormone Test / Bone mineral density / Biological age test / Chest radiogram / Abdominal Ultrasonography / Gastroscopy (or upper gastrointestinal series)

• **add for female** : Mammography / Liquid-based cervical cancer screening test, HPV DNA test

Health check-up program for healthy aging management for over 60s

M 1,110,000 **F** 1,260,000

Silver Checkup

Anthropometry / Obesity / Vision, Intraocular pressure, Fundus / Pulmonary function test / grip test / Electrocardiogram / Fecal examination and Urinalysis / Blood test III (Blood test II + Bone Markers, Vitamin D, etc.) / Pure tone audiometry / Bone mineral density, Muscle mass measurement / Chest radiogram / Abdominal Ultrasonography / Gastroscopy (or upper gastrointestinal series)

• **add for female** : Mammography / Liquid-based cervical cancer screening test, HPV DNA test

※ There are additional costs for sedation endoscopy or biopsy during the checkup

- Sedation (gastroscopy) : 104,000 / Sedation (colonoscopy) : 130,000 / Sedation (gastroscopy & colonoscopy) : 156,000

Premium Health Checkup Program

A high quality health checkup program that precisely conducts various cancer tests

※ Provide CD copy of image examination

[W]

Comprehensive screening program for various cancers and diseases of each organ for over 40 years of age

M 1,976,000 **F** 2,106,000

Blue Cancer Checkup

Blue checkup

+ Heart rate variability & Blood vessels elasticity test
+ Ultrasonography (Thyroid, Male-Prostate / Female-Breast)
+ Colonoscopy
+ Low-dose Chest CT, Abdomen & Pelvic CT, Abdominal obesity CT

Comprehensive screening program including major cancers and cardiovascular diseases for over 40 years of age

M 2,041,000 **F** 2,171,000

Blue Cardio-vascular Checkup

Blue checkup

+ Heart rate variability & Blood vessels elasticity test
+ Ultrasonography (Thyroid, Male-Prostate / Female-Breast)
+ Colonoscopy
+ Low-dose Chest CT, Coronary CT angiography, Abdominal obesity CT

Comprehensive screening program for middle-aged diseases, various cancers, and diseases of each organ

M 2,171,000 **F** 2,301,000

Gold Cancer Checkup

Gold checkup

+ Atherosclerosis test, Muscle mass measurement
+ Ultrasonography (Thyroid, Male-Prostate / Female-Breast)
+ Colonoscopy
+ Low-dose Chest CT, Abdomen & Pelvic CT, Abdominal obesity CT

Comprehensive screening program including middle-aged disease, major cancers and cardiovascular diseases

M 2,236,000 **F** 2,366,000

Gold Cardio-vascular Checkup

Gold checkup

+ Atherosclerosis test, Muscle mass measurement
+ Ultrasonography (Thyroid, Male-Prostate / Female-Breast)
+ Colonoscopy
+ Low-dose Chest CT, Coronary CT angiography, Abdominal obesity CT

Additional specialized tests for each organ

In the basic health checkup program, specialized tests for each organ can be added.

		[W]
<input type="checkbox"/> Gastroscopy	Gastric disease such as esophagus cancer, gastric cancer, duodenitis, ulcer, etc.	117,000
<input type="checkbox"/> Colonoscopy	Inflammation, ulcer, polyp of colon, colorectal cancer	260,000
<input type="checkbox"/> Coronary CT angiography	Coronary artery stenosis, occlusion	481,000
<input type="checkbox"/> Abdomen & Pelvic CT	Cancer of the abdominal organs (Liver, Gallbladder, Kidney, Pancreas, Bladder, Uterine, Ovarian, etc.)	416,000
<input type="checkbox"/> Low-dose Chest CT	Bronchopulmonary disease, lung cancer	195,000
<input type="checkbox"/> Brain MRI/MRA & Carotid MRA	Brain tumor, cerebrovascular disease, cerebral aneurysm, carotid artery diseases	1,206,000
<input type="checkbox"/> Brain MRA	Cerebrovascular diseases, cerebral aneurysm	715,000
<input type="checkbox"/> Carotid Doppler	Carotid artery diseases	221,000
<input type="checkbox"/> Atherosclerosis Test(PWV)	Arterial stiffness and lower extremity artery stenosis	52,000
